

## **Abstract**

The bachelor thesis deals with the state budget of the Czech Republic. It is focused on the state budget as a whole (its creation and budgetary procedure especially affected by political decisions, instruments and function etc.). There is introduced the evaluation of trends of the budget between years 1993-2007 in the thesis. Since 1997 until 2010, the Czech Republic has the deficit budget. The trends in partial years are demonstrated by way of the charts, and on these bases, the analysis, comments and conclusion were carried out. Further, the budgetary positions in the countries of European Union and in the Czech Republic are described.
